Building a mobile version of your site has never been so easy, and no Joomla! Accessibility need to start a new site from scratch! Search within your results Clear search. Different templates will use different classes.

You can also choose to add a gradient overlay and a border. This type of analytics stats is no more limited to track the point coordinates in the page that has been clicked in a particular screen resolution, now real HTML elements receiving clicks are tracked and shown in the heatmap making it working for visits received by smartphone and tablets! This plugin will show in frontend as a little toolbar that you can position at the top or at the bottom of the page Joomla! Accessibility to zoom contents. All data exchanged by the chat application is streamed on your Joomla site, this enforces security and allows you to be the only owner of your Joomla! Accessibility application and user informations.

Documentation Didn't really go into. An amazing module manager as you have never tried before!
